| <input type="checkbox"/>  BASIC EDUCATION AND LITERACY DEVELOPMENT | <input type="checkbox"/>  ECONOMIC AND COMMUNITY |
| <input checked="" type="checkbox"/> ENVIRONMENT | |

1. OBJECTIVES

This project seeks to contribute to the resolution of environmental problems; to promote intersectoral and inter-institutional work to solve problems with a high educational content (development of competencies to promote an ethical, comprehensive and quality education); to the promotion of group and community work. The area of influence of the Quebrada La Mosca as a source of interest, but with the ability to reach the general environment of the local water component.

2. NEEDS

It is necessary to train and implement sanitation and environmental education measures, to achieve objectives such as improvement of the quality of life of the inhabitants, and general conditions of the environment. To serve as a preamble in conducting educational campaigns for sanitation based on hygiene and safe water, caring for the environment. Promote participation activities in the spaces of the creek that require cleaning, reforestation and the empowerment of communities towards this natural resource.

This project will have a community reach of more than 300 families who live near the creek with more than 1200 inhabitants, but there are also more than 20 companies settled in this public service corridor directly influenced by the Quebrada La Mosca, on its way from the municipality of Guarne where it rises to Rionegro where it empties into the Negro river.

Beneficiaries

Direct Beneficiaries	Indirect Beneficiaries
1200	2800

Activities to develop:

- } Recognition and participation in the construction of social and cartographic maps, based on participatory diagnoses.
- } Education and training for community leaders, organized groups (schooled or not) in the recognition of resources and their eco-systemic value, to strengthen an environmental culture, through training, research, communication and dissemination for active participation.
- } Raise awareness in the community about the importance of conservation, preservation and management of the environment, with a fundamental concept on the issue of Safe Water.
- } Promote social, natural and cultural sustainability in the community, allowing important results to be obtained in solving problems that are currently being presented in order to mitigate future ones.

3. SUSTAINABILITY

The work of identifying problems through community inclusion, with the construction of a social map developed with the participation of the community itself, will generate the proposal to establish plans, programs and projects with the leaders of the Aqueduct and Community Action Boards. , as well as with the educational institutions that exist in the surroundings of the Quebrada La Mosca. The participation of the companies in the sector is very important, achieving support agreements through the issue of Social and Environmental Responsibility of the same.

The social and economic component of the area can be a favorable point in the development of the scope of the environmental component that is intended through inclusion, education and training.

The duty of municipal institutions, in this case the Administrations of the Guarne and Rionegro Municipalities, and the Environmental Corporation of this Region, cannot be ignored, who are fundamental and competent in these matters. In front of them it will be necessary to manage, resources, aid in pedagogical support or accompaniment, as well as control and monitoring of the environment and its communities, as a guiding principle of the sustainability of this project.
